Outbound Email Security Solutions

Stop Sensitive Emails from being sent to the Wrong Recipients

Prevent Data Leaks | Reduce Risk | Strengthen Compliance

Standss

Microsoft Partner
Silver Application Development

The Problem

Have you ever sent an email to the wrong person?

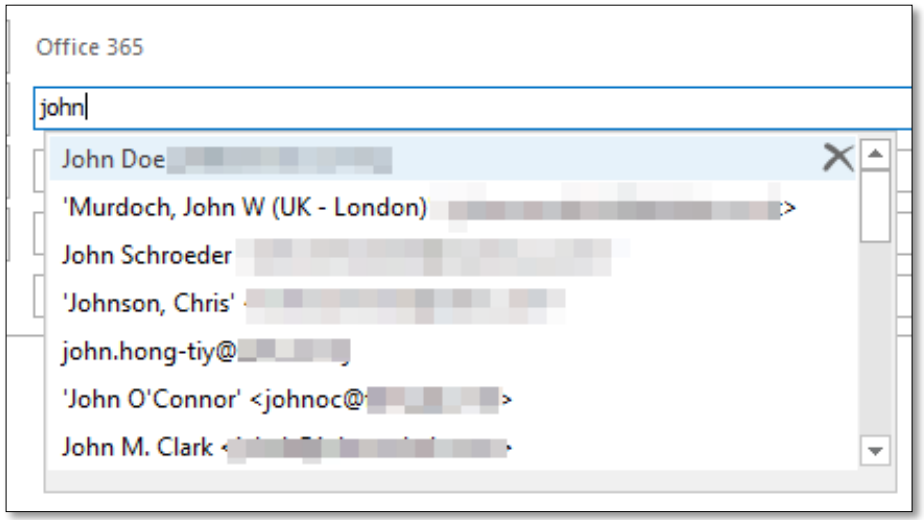

58% of people have sent an email to the wrong person while at work.

https://www.standss.com | sales@standss.com

The Problem

It's an EASY MISTAKE to make!

1

Outlook Auto-Complete (Selecting wrong recipients because names are similar)

2

Selecting wrong attachments

3

Reply-All Storm (Selecting too many recipients)

https://www.standss.com | sales@standss.com

The Solution: SendGuard

Prompt to Confirm Recipients and Attachments
Get users to review and confirm recipients and attachments before emails are sent out

Reliable Recall
Unsend Emails even after clicking Send. Delay (non-urgent) emails for to allow "recall" of sent emails

Detect Sensitive Content (DLP/Rules)
Detect sensitive or inappropriate content. Performed custom checks before emails are sent out

Reduce Reply/Reply-All Leaks and Spam
Get users to review and confirm recipients when Reply-All is clicked

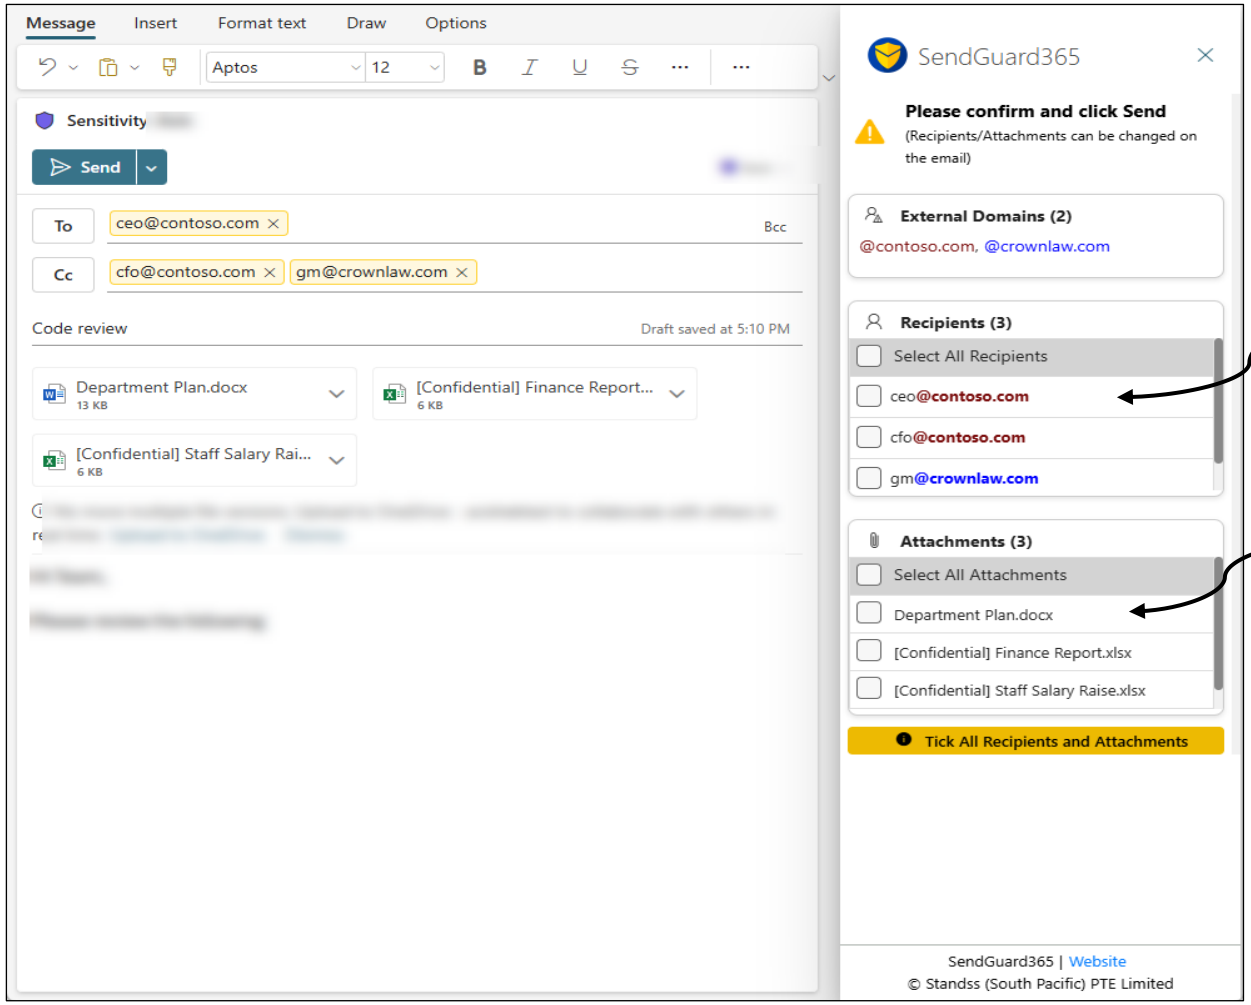

Centrally (Admin) Managed Settings
Use our Portal, Intune or GPO to deploy, lock down and manage settings.

- Prevent **confidential emails** and **sensitive/private data** being sent to the **wrong recipients**
- **Reclaim time and productivity** lost to indiscriminate use of email, replies and **reply-alls**

1. Confirm Before Send

Confirm Recipients and Attachments *before* emails are sent out

Confirm Recipients
External domains color-coded for easy identification

Confirm Attachments

https://www.standss.com | sales@standss.com

2. DelayGuard

Smart Delay to allow Email Recall

Delay **sensitive emails** such as those with attachments or going to external recipients

Provide a **window to recall email** before it leaves your Outlook

Bonus: **Add missing information** to correctly addressed emails that you think of after you click Send.

3. Data Loss Prevention (DLP)

Detect/Warn/Block Sensitive or Inappropriate Content

Contents to fix before sending

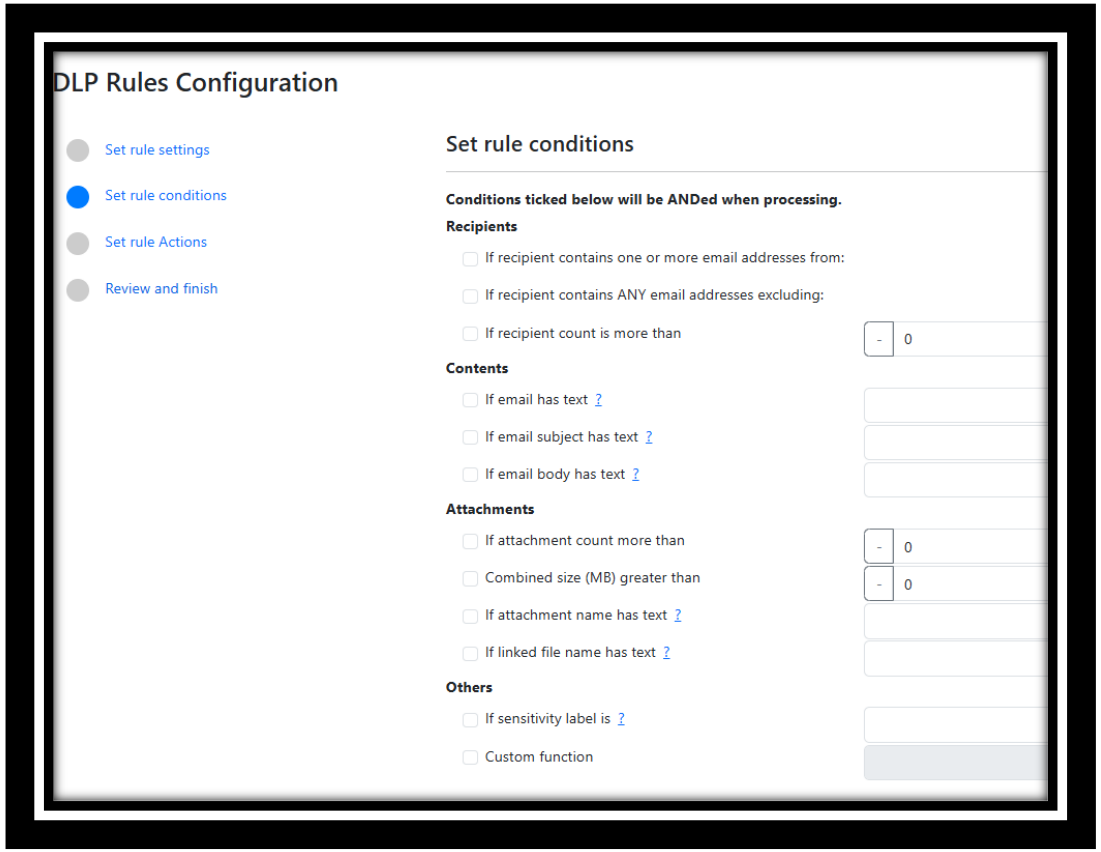

Prompt the user if Sensitive or Inappropriate Content is detected

Set Level of Severity: **Confirm before Send** or **Block Emails**

https://www.standss.com | sales@standss.com

4. Send Rules Compliance Policies

Do you have Special Compliance Requirements?

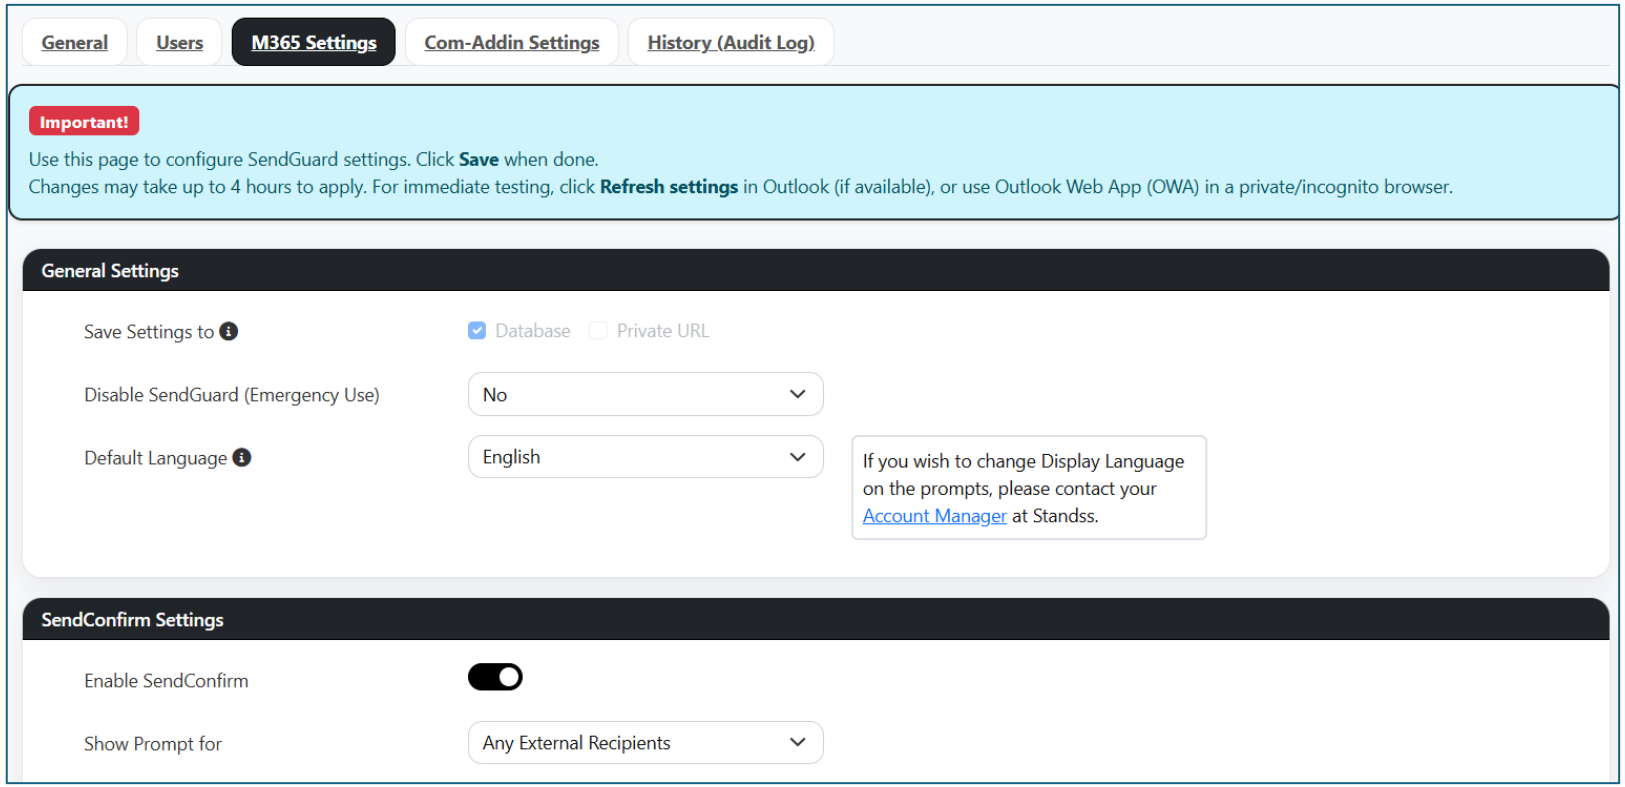

Use **SendRules** for complex Checks (**IF**) and
Auto Actions (**THEN**) on outgoing emails (**Prompt**, **Block**, **Auto-CC, Encrypt etc**
